

Simplified Clinical Rotary Endodontic Program

3 Day Rotary Endodontic Program

@Bangalore

Course Content

- 1- Case Selection Diagnosis treatment Planning
- 2- Access Pre-Molar ,Molar ,Anterior
- 3- Working length 5th /6th Generation apex locator
- 4- Chemo Mechanical Preparation
 - a. Apical Gauging
 - b. Irrigation Protocol
 - c. Intra Canal Medicament.
- 5- Rotary Reciprocating -Adaptive Method
Protaper Gen Endo,Trunatomy ,Blueflex ,Neo
- 6- Obturation-Single cone with BAG Sealer
-lateral Compaction
-WVC
- 7- Core Build Up /Access Filling Technique

What you Learn

1. How to Select a Case for single Visit or multiple Visit Endo
2. Straight line Access for Molar and premolar to reduce instrument fracture
3. How to get accurate working length using Apex locator
4. Mechanical -Biological Objectives of modern Endodontics
5. How to Create a glide Path and determine the Working Width
6. How to program Endomotor for Optimal Performance
7. How to manage narrow Curved Canals
8. How to Select Rotary System for Various types of Canals
9. How to Disinfect the Canal and irrigation protocol .
- 10 How to Use intracanal medicaments during Multiple Visit Endodontics
11. How to Select Sealer?
12. How to Obturate using Single Cone , Lateral Compaction , Thermoplastic Methods
13. How to Achieve Coronal Seal
